Nazar Poroshchuk

AI in Business Engineering Student · AI Tools · Web3 Community · 3D Art

Lublin, Poland | nazarporoshuk123@gmail.com | X: @elessarqq | GitHub: Elessarxai | nazar-poroshchuk.pages.dev

SUMMARY

Second-year Artificial Intelligence in Business engineering student at Lublin University of Technology with five years in crypto and Web3: NFT mints, 30+ testnets and onchain projects, and community work for Succinct, MagicBlock, RE and Axis Robotics. Uses AI tools (ChatGPT, Codex, Claude Code, Grok) daily for coding, research and writing; writes about AI and Web3 on X and makes 3D art.

EDUCATION

Lublin University of Technology (Politechnika Lubelska), Lublin, Poland — Oct 2025 – Feb 2029 (expected)
B.Eng. in Artificial Intelligence in Business, Faculty of Management

Relevant coursework: Algorithms and Data Structures, Graph Theory, Probability and Statistics, Linear Algebra, Information Systems, Fundamentals of Marketing, Fundamentals of Finance and Accounting.

PROJECTS

- **StickyOverlay** (Python, PySide6): Windows desktop overlay app that pins images, GIFs and videos above other windows, with always-on-top, click-through, drag and resize.
- **FunPayCardinal plugin** (Python, REST API, Telegram): plugin for the FunPayCardinal seller bot that connects a Steam top-up API and adds a Telegram-based settings menu.
- **Personal AI workspace** (Obsidian, Claude Code, Codex, Git): knowledge base that gives AI agents shared context (profile, rules, reusable skills, memory), versioned in a private GitHub repo.
- **AI Relay** (multi-model AI workflow): free workflow where different AI models research, write and fact-check each other's work, so no model grades its own output; published as an X thread.
- **Text RPG game** (Python, university): multi-file object-oriented game built as a bonus course project and defended in person.

EXPERIENCE

Content Creator, X (@elessarqq) · AI, crypto and tech — 2022 – Present

- Writes posts, threads and long-form X Articles on practical AI workflows and agents, e.g. a 3-file fix for losing context in new Claude chats and a full guide to Claude for trading research.
- Fact-checks claims against primary sources, e.g. testing claims about X's ranking against its open-source code.
- Creates motion-graphics videos and visuals for posts with AI tools; 1.4M impressions over the past 12 months, peak days above 200K.

Web3 Community Contributor, Succinct, MagicBlock, RE, Axis Robotics — 2021 – Present

- Started in crypto with NFT mints, then contributed onchain to 30+ testnets and other Web3 projects.
- Succinct (2025): created a series of 3D scenes, posts and threads about zero-knowledge proofs; the work earned a $6K community reward.
- MagicBlock, RE and Axis Robotics (2026): made 3D art for all three communities, a $BLOCK presale breakdown and posts on X; joined the Axis Robotics testnet.

Freelance Seller, FunPay · digital goods marketplace — 2025

- Sold digital goods and handled listings, buyer messages and order delivery.
- Automated Steam top-up orders with a self-built FunPayCardinal plugin.

SKILLS AND LANGUAGES

AI tools: ChatGPT, Codex, Claude Code, Grok and Grok Bot, used daily for coding, research and writing; prompt writing; reviewing and fixing AI-generated code.

Programming: Python (OOP, PySide6, API integration), AI-assisted coding, Git and GitHub.

Content marketing: hook and headline writing, covers and visuals for posts, post analytics (impressions, engagement, bookmarks); learned through paid creator courses and applied daily on X.

Other tools: Blender (3D scenes), Excel (formulas, statistical tests), Obsidian, short-form video editing.

Languages: Ukrainian (native), Russian (fluent), Polish (studies in Polish), English (B2–C1).
